

## System telephone with extension-busy-indicator for tiptel 410 S clip / 810 S clip tiptel 72 system

Knowing who is calling before the handset is picked up – the tiptel 72 system displays the phone numbers of incoming calls (CLIP). At the same time, you can see which of your ISDN phone numbers has been called. Private and business calls can thus be easily distinguished. The busy indicator displays at any time which member of the staff is holding a telephone call at the moment.

The menu-guidance of the tiptel 72 system helps you to optimise the functions and features of your telephone systems tiptel 410 S clip or tiptel 810 S clip.

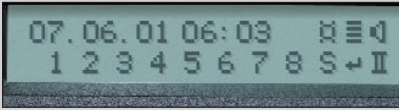

Even the basic configuration and programming of the telephone system can be carried out, e. g. if this has to be done without a PC.

- indication of caller's phone number or name (CLIP)
- indication of all busy extensions of the ISDN telephone system
- automatic redialling function in case of busy tone
- 2-line alphanumeric display
- telephone directory for 100 phone numbers with names
