Trouble Shootings

Trouble	What to do?
No video on the monitor screen	Check camera and monitor power. Check the power polarity. Check the video cable connection.
Color rolling	It happens when the camera is exposed between too strong and too weak light. It isn't a faulty problem and please change the camera position.
The image on the screen is dimmer.	Check if the lens is stained. If dirty, clean the lens with soft and clean cloth. The image is dimmer at night than daytime. If focus is not right, adjust it at daytime.
Black and thick bars roll and too noisy on the screen.	Check the power adaptor capacity. If the capacity is less than 300mA, please change it to over 300mA. If there are too noise, check video coaxial cable.
